CAREER OBJECTIVE

B.Tech Information Technology student at PICT with a CGPA of 8.58, passionate about full-stack development, software engineering, and problem solving. Experienced in building scalable web applications using React, Node.js, Express, PostgreSQL, and Prisma. Seeking a Software Engineering Internship to contribute to impactful projects while expanding technical expertise.

EDUCATION

Pune Institute of Computer Technology (PICT)
B.Tech in Information Technology
2024 – 2028 | CGPA: 8.58 / 10

Higher Secondary Certificate (HSC)
Class XII: 73%

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Basic Python

Core Concepts: Data Structures & Algorithms (DSA), Object – Oriented Programming (OOP), DBMS

Database: MySQL, MongoDB, PostgreSQL

Framework: React.js

Tools: GitHub, Visual Studio Code

Concepts: Full Stack Web Development

PROJECT

Campus Connect — Full Stack Campus Event Management Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Cloudinary

- Developed a centralized web platform for managing and browsing campus events, allowing students and organizers to create, register, and track events in one place.
- Built the frontend using React.js and integrated backend APIs using Node.js and Express.js; used PostgreSQL with Prisma ORM for data management.
- Implemented user authentication with JWT and email OTP verification, along with role-based access for students and organizers.
- Integrated Cloudinary for media uploads and deployed the frontend on Vercel and the backend on Render.
- Tested authentication, event creation, registration, and filtering workflows, reducing deployment issues through comprehensive validation.

Servely — Full-Stack Food Ordering & Delivery Platform

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT

- Developed a full-stack food ordering and delivery platform with secure user authentication and OTP verification.
- Implemented menu management, order tracking, payment, and delivery modules with role-based access control.
- Designed a scalable PostgreSQL database using Prisma ORM to manage users, orders, payments, and deliveries.

CERTIFICATIONS

- NPTEL Certification
- TechFiesta Hackathon Participation Certificate

ACTIVITIES

- Participated in a college hackathon and collaborated with a team to build a software solution within a time constraint.
- Developed and deployed a full-stack web application to solve campus event management challenges.
- Actively learning web development technologies and exploring new tools through online courses and documentation.
